

My Statistics 3494W Paper

Michael Marcaccio

September 26 2022

Abstract

One-paragraph summary of the entire study - typically no more than 250 words in length (and in many cases it is well shorter than that), the Abstract provides an overview of the study.

Introduction

What is the Topic and Why is it worth Studying? – the first major section of text in the paper, the Introduction commonly describes the topic under investigation, summarizes or discusses relevant prior research (for related details, please see the Writing Literature Reviews section of this website), identifies unresolved issues that the current research will address, and provides an overview of the research that is to be described in greater detail in the sections to follow. Why is the topic interesting? What has been done on this topic in the literature? What is your contributions? Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris.

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie

vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.

Data Description

Use this section to describe the data that helps to answer your research questions. Recall Einstein's equation

$$E = mc^2, \tag{1}$$

which states that the energy E of a particle in its rest frame as the product of mass (m) with the speed of light squared (c^2).

Methods

What did you do? – a section which details how the research was performed. It typically features a description of the participants/subjects that were involved, the study design, the materials that were used, and the study procedure. If there were multiple experiments, then each experiment may require a separate Methods section. A rule of thumb is that the Methods section should be sufficiently detailed for another researcher to duplicate your research.

Results

What did you find? – a section which describes the data that was collected and the results of any statistical tests that were performed. It may also be prefaced by a description of the analysis procedure that was used. If there were multiple experiments, then each experiment may require a separate Results section.

$$\pi r^2. \tag{2}$$

To reference an equation: Equation (2) is about the area of a circle.
An unnumbered equation looks like:

$$f(x) = \frac{1}{\sqrt{3\pi}} \exp$$

Table 1 summarizes some example draws from some distributions.
Figure 1 shows the distance against the speed from this dataset.

Table 1: This is my first table.

normal	poisson	gamma
-0.110	4	2.401
0.116	4	3.529
-0.828	9	2.112
-0.066	6	11.104
0.219	3	4.815
0.303	5	2.188
0.544	0	8.050
-2.617	8	3.646
0.747	1	5.178
-1.103	4	3.043

Figure 1: This is my first figure.

Discussion

What is the significance of your results? – the final major section of text in the paper. The Discussion commonly features a summary of the results that were obtained in the study, describes how those results address the topic under investigation and/or the issues that the

research was designed to address, and may expand upon the implications of those findings. Limitations and directions for future research are also commonly addressed. What are the main contributions again? What are the limitations of the study? What is worth pursuing further in the future?

Is this how to make a new paragraph? Here is a citation (AUTHORNAME, 2017). CITEP DOES NOT USE AUTHORS NAME IN MY WORDS Here is a citation Baramidze (2013). CITET USE THE AUTHORS NAME IN MY WORDS, probably using this one

References

AUTHORNAME (2017). Titlename. *JOURNALNAME* 4(12), 354–357.
